

## Sprint 3 Review

**Team:** TEAM 403  
**TA:** Praveen Kumar Singh  
**Review Date:** 12/11/2018

### Base Expectations

1. Adding a notion of user and groups of users to the system, if that's still an issue.  
*Comments: Up and running.*
2. Directing messages to individuals and groups if that's still an issue.  
*Comments: Up and running.*
3. Queue messages to users  
*Comments: Only for user not for group -1*
4. Duplicating messaged for subpoenas.  
*Comments: Works perfectly*

### Stretches

5. Stretch (small) Creating a message to recall messages sent.  
*Comments: +2 works*
6. Stretch (small) Wrap message stored in the system with the sender's and receiver's IP address.  
*Comments: +1 Sender IP address  
+1 Receiver IP address*
7. Stretch (medium) Add a parental control feature, watching and flagging messages for inappropriate content  
*Comments: +1 Only marked as inappropriate (showing actual word In chatter)*
8. Stretch (large) Do item 7 in line with message delivery without significant delay.

*Comments: NA*

9. Stretch (small) Search for a message based on some attribute: e.g. sender, receiver, timestamp.

*Comments: +1 search by sender*

*-1 any user can search for any other user*

10. Stretch (medium-large) Use Apache JMeter™ to run system tests to determine any or all of the following:

*Comments: NA*

## **Environment**

11. Dynamically turn on or off logging in the system. (This presumes you have logging embedded in the system.)

*Comments: NA -1*

12. Stretch (small): Send failure notices to your Slack. The notice should include the level of criticality, what failed, and a synopsis of the failure.

*Comments: +1*

13. Stretch (small): Send security concerns to your Slack (as a placeholder for informing Security). This could be failed log-ins, messages to non-users, etc.

*Comments: +1*

Comments:

**Team Score: 91**
